

TRADING CRYPTO ASSETS

LIVE FREE WEBINAR AVAILABLE ON

30 MARCH 2021 | 8.30 PM - 9.30 PM

WHAT IS THE PROGRAMME ALL ABOUT?

Trading Crypto Assets (Bitcoin, Ethereum, Litecoin & XRP) with SIDC is the first retail investor focused education programme in Malaysia that equips aspirational traders with the knowledge and tools to trade the four approved crypto assets in a responsible and informed manner. One-year since the Securities Commission (SC) Malaysia has paved the way by regulating crypto assets and its market operators (DAXs) in October of 2019, the public still has not fully explored trading crypto assets and the various products offered by DAXs. This will be a product- focused and technical skill building programme for more sophisticated investors/traders. Given the high volatility of crypto assets and the compounded impacts of covid-19, it is essential that there is a strong emphasis on risk management and analytical trading, shying away from being driven by emotions. This programme will discuss the different products available to traders and various strategies they can utilise when trading. Lastly, it will also discuss the various factors that influence the performance of crypto assets.

WHAT DO WE WANT TO ACHIEVE?

The programme is designed to provide you with the following objectives:

- Increase awareness of the aspirational traders by educating them with the necessary knowledge to trade crypto assets (Bitcoin, Ethereum, Litecoin and XRP) in an informed and responsible manner
- Educate participants regarding all they need to know about crypto assets: unique features, history, terminologies of the four approved crypto assets; best practises to store it securely; the used cases for traders and various factors that determine its performance
- Provide a holistic view of crypto assets as an asset class and how it has performed compared to other asset classes during the covid-19 pandemic
- Inform participants regarding the risks and rewards of trading crypto assets, as well as their rights (legality) and responsibilities (taxation) when trading crypto assets via Recognised Market Operators (RMO)
- The regulated methods to trade crypto assets
- Educate aspirational traders regarding proper risk and portfolio management

WHAT WILL YOU LEARN DURING THE PROGRAMME?

Upon completion of this programme, participants will be able to:

- Explain how to trade crypto assets (Bitcoin, Ethereum, Litecoin and XRP) as an informed and responsible trader
- Identify unique features, history, terminologies of the four approved crypto assets
- Discuss best practices to store crypto assets securely & used cases for traders
- Explain various factors that determine the asset class' performance
- Describe how crypto assets has performed as an asset class compared to other asset classes during the Covid-19 pandemic
- Explain risks and rewards of trading crypto assets, as well as their rights (legality) and responsibilities (including taxation) when trading crypto assets
- Apply regulated methods to trade crypto assets
- Execute basic strategies when trading crypto assets
- Implement risk and portfolio management in crypto assets
