UNDERSTAND MARKET DIRECTION USING MOVING AVERAGE IN DERIVATIVES TRADING

25 AUGUST 2022
8.30PM - 9.30PM

LIVE For more details, visit **www.sidc.com.my**

DERIVATIVES PROGRAMMES FOR **INVESTORS**   This initiative is supported by the **Capital Market Development Fund (CMDF)**

WHAT IS THE PROGRAMME ALL ABOUT?

The moving average is one of the technical analysis tool to understand and forecast market direction begin with the process of price analysis. Generally, there are two (2) types of moving averages used by technical analyst i.e. Simple Moving Average (SMA) and Exponential Moving Average (EMA). Moving average plots average prices over a defined period of time and typically overlaid onto a candlestick or bar chart to guide trader and investor in executing appropriate trading strategies in derivatives trading.

This webinar will take participants on a journey of discovery on their technical analysis skills. It provides participants knowledge on moving average and how to understand the market direction when applying moving average onto a candlestick chart for trading and investment.

WHAT DO WE WANT TO ACHIEVE?

This webinar is designed to provide participants with knowledge on moving averages and how to apply them in understanding the market direction for derivatives trading.

WHAT WILL YOU LEARN DURING THE PROGRAMME?

Upon completion of this programme, participants will be able to:
- describe Simple Moving Average (SMA) and Exponential Moving Average (EMA)
- interpret moving averages overlaid onto a candlestick chart
- discuss market's pattern for FCPO and FKLI market direction for FCPO and FKLI using moving average
