9-10 MARCH 2024

9.00AM-6.00PM

PROGRAMME OVERVIEW

Investment Management and Corporate Finance Programme is a 2-day programme designed to provide insights on fundamental aspects of investment, economic fundamentals, financial statement analysis, valuations, derivatives and corporate exercises. This programme will be facilitated by an experienced and qualified trainer.

PROGRAMME OBJECTIVE

This programme is designed as a refresher course for Capital Markets Services Representative Licence (CMSRL) or Employee of Registered Person (ERP) who are interested to learn about fundamental aspects of investment management and corporate finance. Apart from this, the programme also serves to support those preparing to sit for the Securities Commission Licensing Examination (SCL) Module 12 on Investment Management and Corporate Finance. It's highly recommended that participants put in a minimum of 120 self-study hours using study aids such as SCL Module 12 e-guide, practice set questions, reading list, latest market updates for maximum benefit and reinforced learning.

LEARNING OUTCOMES

- Upon completion of this programme, participants should be able to:
- recognise the investment environment of the Malaysian capital market
 - outline the economic fundamentals
 - distinguish the inter-relationship between corporate finance, investment and strategic management
 - define the concept of shareholder value and its determinants
 - explain the techniques of financial statement analysis and use of various ratios to gain insights into a company's performance measure
 - identify methods of computing economic value added and market value added
 - define the concept of time value of money and opportunity cost of capital
 - explain the capital budgeting techniques used in making project decisions
 - distinguish the relationship between risks and returns and how they are measured
 - identify the levels and implications of market efficiency on technical and fundamental analysis and portfolio management
 - explain the basic portfolio theory
 - explain the process of portfolio management and evaluation of its performance
 - explain the common forms of financing and factors to consider in determining the optimal capital structure
 - discuss the financing decisions which cover debt financing, equity financing and dividend policy
 - define definitions of value and role of valuation
 - explain valuation methodologies and their limitations
 - identify various forms of derivatives instruments used to hedge financial risks arising from the financing and investment decisions of a company
 - discuss interaction of financing and investment decisions in corporate restructuring, mergers and acquisitions

PROGRAMME METHODOLOGY

This programme will be delivered using effective learning methods including presentations, discussions and Q&A.
