CERTIFIED CORPORATE SUSTAINABILITY PRACTITIONER 1 (CCSP 1) ASSESSMENT OUTLINE

The Certified Corporate Sustainability Practitioner 1 (CCSP 1) assessment is designed to test candidates' knowledge and skills in key areas of corporate sustainability including sustainability essentials, transformation, reporting and governance.

Candidates are expected to possess good knowledge and understanding of the subject matter provided in this outline and the specified references. Candidates are required to attend the NSRF Preparers' Programme (NPP) Module 1 - Sustainability Reporting Using the ISSB Illustrative Sustainability Report workshop and complete the CCSP 1 - Sustainability, ESG and SRI Essentials e-learning programme. It is estimated that the CCSP 1 will require a minimum of 35 hours of self-study time (including the 4 hours recommended learning hours to complete the 8 modules in the CCSP 1 - Sustainability, ESG and SRI Essentials eLearning). Candidates may need less or more depending on the education background and work experience and will be given at least two (2) months' access to the CCSP 1 eLearning and workshop materials prior to sitting for the assessment.

Candidates are expected to update themselves with the latest developments in this assessment as all questions will be continuously updated to reflect these changes.

Candidates are required to comply with the registration terms and conditions of the SIDC on the conduct of the assessment. Severe penalties will be taken against candidates for any misconduct during the assessment.

ASSESSMENT STRUCTURE

Details of this assessment are as follows:

Types of Questions	Multiple Choice Questions
Number of Questions	50
Passing Mark	60%
Time Allocated	120 minutes

ASSESSMENT OBJECTIVES

For the Certified Capital Market Professional - Sustainable and Responsible 1 (CCMP-SRI1) assessment, candidates are expected to be able to:

- Identify key sustainability factors, concepts, principles, strategies, and methodologies used to evaluate and strengthen a corporate sustainability framework.
- Explain key concepts and requirements of the sustainability reporting landscape, including the assurance ecosystem, conceptual foundations, and mandatory disclosure requirements.
- integrate ESG principles, strategies, and methodologies into organisational decision-making, operations, and governance processes in accordance with Malaysian regulatory requirements, established taxonomies, standards, and best practices.
- Apply sustainability assessment methodologies using relevant data and criteria to determine compliance and alignment with Malaysian regulatory frameworks, taxonomies, standards, and best practices, and to provide informed recommendations for organisational sustainability initiative
